

Diploma degree
Dermatology- paper 1
Time allowed: 3 hours
Date: 24/10/2022
Total marks: 90

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Mention the immunologic functions of Langerhans cells and their roles in different skin diseases (10 marks)
- 2- Give an account on immunobullous IgA dermatoses (10 marks)
- 3- Give a short account on:
 - a) Hideradenitis suppurativa (5 marks)
 - b) Piebaldism (5 marks)
 - c) Neonatal pustular melanosis (5 marks)
 - d) Nail signs due to abnormal nail matrix function (5 marks)
- 4- Describe Systemic lupus erythematosus in pregnancy (clinical picture, diagnosis and treatment) (15 marks)
- 5- Summarize physical urticaria (10 marks)
- 6- Identify the causes of hair color changes (10 marks)
- 7- Differentiate dermoscopically between papulosquamous skin diseases (15 marks)

Good Luck

رئيس القسم / ا.د طارق امين

Master degree
Dermatology- paper 1
Time allowed: 3 hours
Date: 24/10/2022
Total marks: 135

Tanta University
Faculty of Medicine
Dermatology & Venerology
Department

All questions should be answered:

- 1- Mention the immunologic functions of Langerhans cells and their roles in different skin diseases (15 marks)
- 2- Give an account on immunobullous IgA dermatoses (15 marks)
- 3- Give a short account on:
 - a) Anhidrosis (10 marks)
 - b) Chediak Higashi syndrome (10 marks)
 - c) Neonatal pustular melanosis (10 marks)
 - d) Nail signs due to abnormal nail matrix function (10 marks)
- 4- Describe Systemic lupus erythematosus in pregnancy (clinical picture, diagnosis and treatment) (20 marks)
- 5- Summarize physical urticaria (15 marks)
- 6- Identify the causes of hair color changes (10 marks)
- 7- Differentiate dermoscopically between papulosquamous skin diseases (20 marks)

Good Luck

رئيس القسم / ا.د طارق امين

Master degree
Dermatology- paper 2
Time allowed: 3 hours
Date: 29/10/2022
Total marks: 135

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Describe causes and management of pruritis in elderly (20 marks)
- 2- Give a short account on:
 - a) Dual porphyria (10 marks)
 - b) Paget's disease (10 marks)
 - c) Lymphomatoid papulosis (10 marks)
 - d) Tumor necrosis factor alpha inhibitors (10 marks)
- 3- Discuss hereditary palmoplantar keratoderma (20 marks)
- 4- Give an account on Monkey pox (10 marks)
- 5- Discuss large vessel vasculitis (15 marks)
- 6- Mention the types and indications of threads insertion therapy in Dermatology (10 marks)
- 7- Demonstrate the types of normolipidemic xanthomas (10 marks)

Good Luck

رئيس القسم / ا.د طارق امين

Diploma degree
Dermatology- paper 2
Time allowed: 3 hours
Date: 29/10/2022
Total marks: 90

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Describe causes and management of pruritis in elderly (15 marks)
- 2- Give a short account on:
 - a) Dual porphyria (5 marks)
 - b) Paget's disease (5 marks)
 - c) Lymphomatoid papulosis (5 marks)
 - d) Mycophenolate mofetil (5 marks)
- 3- Discuss hereditary palmoplantar keratoderma (15 marks)
- 4- Give an account on Monkey pox (10 marks)
- 5- Discuss Pseudo-kaposi sarcoma (10 marks)
- 6- Mention the types and indications of threads insertion therapy in dermatology (10 marks)
- 7- Demonstrate the types normolipidemic xanthomas (10 marks)

Good Luck

Diploma degree
Andrology exam
Time allowed: 3 hours
Date: 31/10/2022
Total marks: 90

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Describe details of cross section of the penile shaft (20 marks)
- 2- Comment on guidelines of management of azospermia (20 marks)
- 3- Discuss causes and management of retrograde ejaculation (20 marks)
- 4- Illustrate pathogenesis of varicocele related infertility (15 marks)
- 5- Summarize management of cryptorchidism (15 marks)

Good Luck

رئيس القسم / ا.د طارق امين

Master degree
Andrology exam
Time allowed: 3 hours
Date: 31/10/2022
Total marks: 135

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Explain the role of central neurotransmitters in controlling penile erection (30 marks)
- 2- Discuss CASA and its role in evaluation of an infertile case (25 marks)
- 3- Comment on causes and management of aspermia (25 marks)
- 4- Illustrate diagnostic role of pharmacopenile duplex in erectile dysfunction (25 marks)
- 5- Give a short account on:
 - a- Blood genital barrier (15 marks)
 - b- Tadalafil (15 marks)

Good Luck

رئيس القسم / ا.د طارق امين

Diploma degree
STDs exam
Time allowed: 3 hours
Date: 10/5/2023
Total marks: 90

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Enumerate the clinical manifestations of early congenital syphilis. (15 marks)
- 2- Discuss diagnosis and treatment of herpes progeneralis (15 marks)
- 3- Summarize Local complications of Gonorrhoea in males (15 marks)
- 4- Describe Criteria for diagnosis of AIDS Related Complex (ARC) (15 marks)
- 5- Give short notes on Diagnostic features and therapy of vaginal discharge (20 marks)
- 6- Discuss classification of prostatitis (10 marks)

Good luck

رئيس القسم: أ.د/ طارق أمين

Diploma degree
STDs exam
Time allowed: 3 hours
Date: 10/5/2023
Total marks: 50

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- Enumerate the clinical manifestations of early congenital syphilis. (10 marks)
- 2- Discuss diagnosis and treatment of herpes progenitalis (10 marks)
- 3- Summarize Local complications of Gonorrhoea in males (10 marks)
- 4- Describe Criteria for diagnosis of AIDS Related Complex (ARC) (5 marks)
- 5- Give short notes on Diagnostic features and therapy of vaginal discharge (10 marks)
- 6- Discuss classification of prostatitis (5 marks)

Good luck

القسم: أ.د/ طارق أمين

Master degree

STDs exam

Time allowed: 3 hours

Date: 2/11/2022

Total marks: 135

Tanta University

Faculty of Medicine

Dermatology & Venereology

Department

All questions should be answered:

- 1- Enumerate causes of bacterial vaginal discharge in females and explain how to differentiate between them (30 marks)
- 2- Describe complications and treatment of anogenital warts (25 marks)
- 3- Discuss asymptomatic gonorrhoea (30 marks)
- 4- Give a short account on solitary genital ulcers (30 marks)
- 5- Discuss treatment of human immune deficiency virus (HIV) infection (20 marks)

Good Luck

رئيس القسم / ا.د طارق امين

Master degree
Andrology exam
Time allowed: 3 hours
Date: 7/5/2023
Total marks: 135

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- **Discuss molecular aspects in penile erection** (30 marks)
- 2- **Give short account on Management of immunological infertility** (25 marks)
- 3- **Explain causes and diagnosis of hyperprolactinaemia** (25 marks)
- 4- **Comment on indications and complications of intracorporeal injection.** (20 marks)
- 5- **Mention ejaculatory disorders in diabetic men and their management.** (20 marks)
- 6- **Discuss male pseudohermaphrodite** (15 marks)

Good luck

رئيس القسم: أ.د/ طارق أمين

Diploma degree
Andrology exam
Time allowed: 3 hours
Date: 7/5/2023
Total marks: 90

Tanta University
Faculty of Medicine
Dermatology & Venereology
Department

All questions should be answered:

- 1- **Discuss diagnostic aspects of veno-occlusive erectile dysfunction.**
(20 marks)
- 2- **Summarize Management of retrograde ejaculation.**
(15 marks)
- 3- **Give short account on Management of hyperprolactinaemia**
(15 marks)
- 4- **Explain causes and diagnosis of immunological infertility**
(20 marks)
- 5- **Mention selective phosphodiesterase inhibitors and their side effects.**
(10 marks)
- 6- **Discuss computer assisted semen analysis (WHO 2021)**
(10 marks)

Good luck

Master exam; Andrology

Time allowed: 3 hours

Date: 22/11/2020

Total marks: 135

Tanta University

Faculty of Medicine

Department of Dermatology

& Venereology

All questions should be answered:

1. Illustrate control of the functions of epididymis. (20 marks)
2. Demonstrate differential diagnosis of chronic solid scrotal swellings. (25 marks)
3. Explain testicular torsion. (20 marks)
4. *Discuss causes of hypergonadotrophic hypogonadism.* (25 marks)
5. Give an account on diagnostic rule of pharmacopenile duplex in erectile dysfunction. (20 marks)
6. Comment on causes and management of aspermia. (25 marks)

Good Luck

Master exam; STDs
Time allowed: 3 hours
Date: 25/11/2020
Total marks: 135

Tanta University
Faculty of Medicine
Department of Dermatology
& Venereology

All questions must be answered:

- 1- What is the outcome of pregnancy of untreated syphilitic mother?
Discuss management of early congenital syphilis. (30 marks)
- 2- Give an account on disseminated gonorrhoea and describe in details
how to diagnose it. (30 marks)
- 3- Enumerate causes of non-offensive infective vaginal discharge and
explain how to differentiate between them. (25 marks)
- 4- Describe structure of HIV, laboratory diagnosis and treatment of
AIDS. (30 marks)
- 5- Give an account on etiology, pathogenesis and management of
herpes proenitalis. (20 marks)

Good luck

Master exam; Derma- paper II
Time allowed: 3 hours
Date: 18/11/2020
Total marks: 135

Tanta University
Faculty of Medicine
Department of Dermatology
& Venereology

All questions must be answered:

- 1- Give an account on cutaneous manifestations of internal malignancy
(12 marks)
- 2- Mention causative organisms, clinical types, diagnosis and treatment of mycetoma
(12 marks)
- 3- Discuss diagnostic features of Langerhans cell histiocytosis
(12 marks)
- 4- Mention facial dangerous zones of dermal fillers injection, possible complications and how to manage them.
(12 marks)
- 5- Write the genetic defects, cutaneous and ocular manifestation of the followings;
a) Neurofibromatosis b) Xeroderma pigmentosa (16 marks)
- 6- Demonstrate the pathogenesis, clinical features, laboratory findings and treatment of the followings;
a) Churg-Strauss syndrome b) Wegener's granulomatosis (16 marks)
- 7- Mention types of primary melanoma, and describe clinical picture and histopathology of each one
(15 marks)
- 8- Mention causes of cutaneous CD 30 +ve lymphoproliferative disorders and describe diagnosis and treatment of one of them
(12 marks)
- 9- Discuss immunotherapeutic modalities for HPV infection
(14 marks)
- 10- Fractional CO₂ laser become a very popular tool for skin rejuvenation. Mention mechanism of action, uses in the field of dermatology and advantages over traditional ablative method.
(14 marks)

Master exam; Derma I
Time allowed: 3 hours
Date: 14/11/2020
Total marks: 135

Tanta University
Faculty of Medicine
Department of Dermatology
& Venereology

All questions must be answered:

- 1- Describe types and roles of epidermal cells. (9 marks)
- 2- Describe autoantibodies associated with different clinical types of lupus erythematosus. (15 marks)
- 3- Give an account on Shulman syndrome. (12 marks)
- 4- Discuss pathogenesis, clinical types and treatment of rosacea. (15 marks)
- 5- Describe the diseases that are presented by Figurate erythema. (15 marks)
- 6- Give an account on the immunopathogenesis of psoriasis and the mechanisms by which biologic medications target the disease. (15 marks)
- 7- What are the major forms of inherited epidermolysis bullosa? Describe the clinical features of each one. (15 marks)
- 8- Discuss minimally invasive and surgical treatment of vitiligo. (12 marks)
- 9- Differentiate non-infectious causes of pustular eruption in the neonate. (12 marks)
- 10- Describe disorders affecting different stages of hair cycle. (15 marks)

Good luck

Diploma Exam
Dermatology – Paper 2
Time allowed: 3 hours
Date: 3 /5/2023
Total marks: 90

Tanta University
Faculty of Medicine
Dermatology & Venereology Department

All questions should be answered:

1. Give an account on renal itch; its pathophysiology and management. (15 marks)
2. Enumerate genodermatoses with photosensitivity and describe the clinical features of two of them. (10 marks)
3. Mention clinical picture and variants of Darier disease. (5 marks)
4. Discuss pityriasis lichenoides. (5 marks)
5. Give an account on complications of Streptococcal skin infection. (10 marks)
6. Describe Sézary Syndrome; clinical manifestations, diagnosis and treatment. (10 marks)
7. Give an account on non-acne uses of isotretinoin in dermatology. (5 marks)
8. Mention types, histopathology and treatment of angiokeratoma. (10 marks)
9. Give short account on:
 - a. Acrodermatitis enteropathica and its treatment. (5 marks)
 - b. Erythema nodosum. (5 marks)
10. Discuss fractional photothermolysis, its types, advantages and indications in dermatology. (10 marks)

GOOD LUCK

Diploma Exam - Dermatology – Paper 2

Time allowed: 3 hours

Date: 3 /5/2023

Total marks: 50

All questions should be answered:

1. Give an account on renal itch; its pathophysiology and management. (5 marks)
2. Enumerate genodermatoses with photosensitivity and describe the clinical features of two of them. (5 marks)
3. Give an account on juvenile xanthogranuloma. (4 marks)
4. Discuss pityriasis lichenoides. (4 marks)
5. Describe Sézary Syndrome; clinical manifestations, diagnosis and treatment. (5 marks)
6. Give an account on isotretinoin in dermatology. (3 marks)
7. Mention types, histopathology and treatment of angiokeratoma. (5 marks)
8. Give short account on:
 - a- Acrodermatitis enteropathica and its treatment. (4 marks)
 - b- Erythema nodosum. (5 marks)
 - c- Reaction in Leprosy. (5 marks)
9. Discuss fractional photothermolysis, its types, advantages and indications in dermatology. (5 marks)

GOOD LUCK

رئيس القسم: أ.د/ طارق أمين
