1-year-old girl with failure to thrive. Axial unenhanced CT scan (A) shows a slightly low density suprasellar mass with prominence of the temporal horns of the lateral ventricles. Sagittal T1-weighted (600/11/2) MR image (B) shows an isointense to hypointense suprasellar hypothalamic/chiasmatic mass. Sagittal (E) and coronal (F) contrast-enhanced T1-weighted (600/11/2) MR images show homogeneous enhancement of the mass.
