

**Quality Assurance Unit**

**TantaUniversity  
Faculty of Medicine**

**Department of Medical Parasitology**

**Course Specifications**

**Medical Parasitology Doctorate  
Degree**

**2016-2017 (PARA 9005)**

Medical Parasitology Doctorate Degree, Course specifications  
University: Tanta Faculty: Medicine Department: Medical Parasitology

### **A- Administrative Information**

- 1- Course title: Medical Parasitology for Doctorate degree**
- 2- Department offering the program: Medical Parasitology Department**
- 3- Department responsible for the course: Medical Parasitology Department**
- 4- Course code: PARA 9005**
- 5- Level: Doctorate degree of Medical Parasitology**
- 6- No. of Credit / Taught hours:**  
Lectures: (4 credit hrs./60 taught hrs.)      Practical: (3 credit hrs./90 taught hrs.)
- 7- Authorization date of course specification: 1/11/2016**

### **B- Professional Information**

#### **1 – Overall Course aims:**

The course aims to prepare a graduate having the ability to perform and perfect the bases and methods of medical research , and teach others and transfer of his medical experience to them through providing broad spectrum of knowledge and skills in Medical Parasitology cover Protozoology so he gain a positive attitude towards

- Awareness about the epidemiology and biology of endemic and non-endemic Protozoa and its impact on human health.
- Wide-scale knowledge about diagnostic work-up of Protozoal diseases.
- Mastering of up-to-date lines of management of different Protozoal infections.
- Awareness towards the current medical problems, and up to date hypothesis in Medical Parasitology.
- Orientation about his role in community development , and environmental safety

#### **2 – Intended learning outcomes (ILOs):**

##### **A- knowledge and understanding:**

*By the end of the course, students should be able to:*

- a.1- Describe the world distribution of Protozoa and explain the factors determining such distribution and their socioeconomic impact on the community
- a.2- Identify the medically important Protozoa, with the host parasite relationship.

a.3-Describe the various aspects of the Protozoa and their diseases (recent taxonomy, life cycle, pathology and pathogenesis, clinical aspects, treatment and expected complications)

a.4-Describe the recent aspects of diagnosis including parasitic, immunologic and biomolecular techniques,

a.5-Describe the mode of action of antiprotozoa chemotherapy used in treatment of each parasitic infection.

a.6- Mention the methods of prevention control of parasitic infection and on individual community levels.

**b. Intellectual skills:**

**By the end of the course the candidate will be able to:**

b.1- Analyze medical problems related to parasitic infections with differentiation between parasitic diseases.

b.2-Correlate clinical manifestations with the causative parasites and their pathogenesis.

b.3-Formulate and rearrange dispersed data related to parasitic infections and to be able to present them in a clear concise form.

b.4-Choose the suitable diagnostic techniques concerning the parasite the parasitic problems encountered (microscopy, serology, or molecular...etc)

b.5-Design and perform an advanced and innovative research in medical Parasitology.

b.6-Suggest applicable prevention and control programs

**c. Professional and practical skills :**

**By the end of the course the candidate will be able to:**

c.1- Perform the basic and modern professional skills in the area of diagnostic Medical Parasitology.

c.2- Assess and establish updated diagnostic strategies.

c.3 Write and evaluate a professional medical report for practical Parasitology.

c.4-Perfect microscopic examination and staining of different medical parasite stages.

c.5-Perfect manipulation of infectious material in a lab or hospital in a safe way.

c.6-Examine laboratory specimens (body fluid, excreta or infected tissues) using recent technological tools

**d. General and transferable skills (Attitude & communication skill):**

**By the end of the course the candidate will be able to:**

d.1-Director share in a teamwork aiming at solving an environmental problem

d.2- Use the update methods and technology for obtaining and transferring scientific data

d.3- Arrange with community authorities for planning and achieving a field plan to combat an environmental health problem

- d.4- Perform continuous medical educations
- d.5- Write the scientific article according to the basics of scientific research.
- d.6- Achieve computer skills necessary to make use of medical databases and use the internet for communication.
- d.7- Manage scientific seminars , with good time management.

**3-Course contents**

**Total 7 credit hours Lectures: (4 credit hrs./60 taught hrs.)**

**Practical: (3 credit hrs./90 taught hrs.)**

Topics	No. of hours			
	Lecture	Tutorial	Clinical/ lab	Self directed learning
Advanced studies of protozoa	10			
Sarcodina				
Mastigophora	15			
Ciliophora	2			
Apicomplexa	20			
Microsporidia	3			
Opportunistic protozoa	5			
Seminar (Special Topics)		2		
Parasitic infections case study		3		
Practical courses:				
1. Identification of different stages of protoz cysts, oocysts and trophozoites free and in blood and tissues.			20	
2. Different methods of urine and stool examinations.			10	
5. Propagation of parasites in culture or maintenance of life cycle of a parasite in experimental animals			20	
6. Serological and immunological techniques			20	
<b>7. Electron microscopic findings in different protozoa</b>			20	
<b>Total</b>	55	5	90	

#### **4-Teaching and learning methods**

Throughout the course the candidate achieves these objectives by the following activities.

A- Attending Lectures.

B- Attending Seminars:

The candidate is expected to attend and participate in meetings that update relevant recent topics in protozoa biology, relevant biochemical and geno-typing of parasites, emerging parasitic problems and advances in parasitic diagnosis and treatment.

C- Attending Practical Courses

#### **5-Student Assessment**

Log book: For follow up practical activities, effective discussion in lectures and attendance (Minimum acceptance attendance in each teaching course is 75%)

- To be eligible to enter the exam, log book should be fulfilled and signed by Head of the department

End of semester exam. : MCQ examination will be during the 15th weeks

-Written, oral and practical examination will be a part of the final examination of the second part.

5.1 Written examination: to assess a.1 -6/b.1/b.2/b.3/b.4/c1

5.2 Practical :to assess c.2,3,4,5,6/ d.2.

5.3 Oral : to assess b3,4,5,6

5.4 logbook to assess d.1/d.2/d.3/d.4//d.5/d6/d7

#### **- Assessment schedule**

Formative assessment each month through log book . After completing the 8 semesters of the second part, the candidate will be eligible to enter written , oral, and practical exams exam hold twice / year at April and October according to post graduate bylaws.

#### **6- Weighing of assessments**

**This semester will be a part of the final exams. of the second part**

<b>Written examination</b>	900 (60%)
<b>Oral examination</b>	300 (60%)
<b>Practical/laboratory work</b>	300 (60%)
<b>Other types of assessment (formative only)</b>	Log book
<b>Total</b>	1500
